PROFESSIONAL PROFILE

Systems Engineering student about to graduate, with hands-on experience in full stack web development (SDLC, debugging, refactoring, QA) and personal projects deployed to production. I complement my development profile with a solid foundation in infrastructure and systems — Linux administration, Identity and Access Management (IAM) for 500+ users — which gives me a complete view of software from build to production operation. Additional training in AI, cybersecurity, and Big Data through an international academic exchange at La Salle Mexico. Looking for a junior development role where I can deepen my technical expertise in a modern stack.

TECHNICAL SKILLS

- **Languages & Web:** PHP, JavaScript, HTML5, CSS3, SQL, Python (basic-intermediate, actively improving), Astro.
- **Development Practices:** SDLC, debugging and QA, refactoring, technical documentation, version control with Git/GitHub.
- **Data:** Power BI, Big Data with Python/R (academic level).
- **Systems & Networking:** Linux/GNU Server administration, hybrid infrastructure (Cloud & On-Premise), SLA management.
- **Identity & Security:** Identity and Access Management (IAM), cybersecurity fundamentals, CTF / ethical hacking (academic level).

WORK EXPERIENCE

Web Developer — Business Insights

October 2023 – April 2024 · Bogotá / Remote · 7 months

- Participated in the full software development life cycle (SDLC), from requirements analysis through deployment.
- Performed refactoring, debugging, and quality assurance on existing web platforms using PHP and JavaScript.
- Diagnosed production issues and produced technical documentation for the development team.

Service Desk Manager — RGC Activa SAS

June 2025 – January 2026 · Remote · 8 months

- Managed Identity and Access Management (IAM) for 500+ employees, handling provisioning, deprovisioning, and privilege levels.
- Performed technical diagnostics on corporate web application issues, acting as the direct liaison between end users and the development team.
- Optimized high-volume technical support workflows under Service Level Agreements (SLAs).

Infrastructure Intern — RGC Activa SAS

December 2024 – June 2025 · Hybrid · 7 months

- Supported the administration of hybrid infrastructure (Cloud and On-Premise), contributing to business operational continuity.
- Executed backup processes and participated in disaster recovery planning to mitigate data loss risk.
- Performed corrective and preventive maintenance on hardware and software, meeting established SLA indicators.

PROJECTS

Vintago.tech — E-commerce Catalog (vintago-tech.netlify.app)

- Designed and deployed an e-commerce landing page with a catalog of 300+ tech products.
- Implemented a direct WhatsApp conversion flow for inquiries and orders, targeting both retail and wholesale buyers.
- Deployed on Netlify with continuous deployment from a Git repository.

Dotaciones JR — Inventory Management Platform

- Built a platform for corporate inventory and supplies control.
- Focused on optimizing logistics processes and improving asset traceability for the organization.

Vintago — Clothing Brand (vintago.com.co)

- Founded and built a clothing brand, integrating branding, product strategy, and web development.

EDUCATION

Systems Engineering — CUN, Corporación Unificada Nacional de Educación Superior

Expected graduation: late 2026

Includes an international academic exchange at La Salle Mexico: Artificial Intelligence with Python and neural networks, offensive cybersecurity (CTF), Big Data with Python and R, Power BI.

- Associate Degree in Software Development — CUN
- Technician in Software Programming — SENA
- Technician in Systems Support — CUN

CERTIFICATIONS & LANGUAGES

- GNU/Linux Server Operating System Configuration — CUN
- English — American School, level B2.1
- Spanish — Native | English — B2 (Upper Intermediate)
